

New Corvette C5/C6 Coil-Over Packages

Single, Double & Drag "R" Series Adjustable Shocks

- **Easy Bolt-In Installation**
Remove the existing shocks and springs and the QA1 C5 / C6 shocks bolt right back in.
- **Ride Height Adjustable**
Threaded aluminum body allows ride height adjustment.
- **These shocks are revalveable and rebuildable by QA1 Authorized Service Centers**

Shock Absorber Options:

Single Adjustable: 18 position simultaneous compression and rebound adjustable valving.

Double Adjustable: 2 knobs each with 18 positions of independent compression and rebound adjustment; total of 324 valving options.

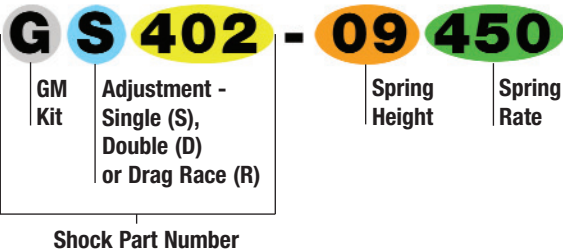

Drag Race "R" Series: 18 position rebound adjustable valving specifically for drag racing.

Corvette C5 / C6 Systems Include:

- (2) Shock absorbers (select from types above)
- (2) 2 1/2" I.D. high performance springs
- All mounting hardware

To Find Your Recommended Kit:

1. Select the spring rate that you prefer for your front end on the top chart.
450# - Nice ride and handling
550# - Performance handling
650# - Firm ride, track handling
2. Select the type of shock you prefer on the left side of the chart.
3. Using the chart, find your front kit part number.
4. Repeat using the bottom chart for rear kit part numbers.

Front End Kit Numbers

Shock Type	450#	550#	650#
Single Adjustable	GS402-09450	GS402-09550	GS402-09650
Double Adjustable	GD402-09450	GD402-09550	GD402-09650
Drag "R" Series	GR402-09450	GR402-09550	GR402-09650

Rear End Kit Numbers

Shock Type	450#	550#	650#
Single Adjustable	GS403-07450	GS403-07550	GS403-07650
Double Adjustable	GD403-07450	GD403-07550	GD403-07650
